

The Lighter Side of Aging™

# LIGHTWAVE™

## TECHNOLOGIES

Advanced Professional LED Light Therapy Systems

Designed for Spas, Medi-Spas, and Medical Offices

### What is it?

LIGHTWAVE's Professional and Deluxe models are state of the art LEDT (Light Emitting Diode Therapy) Systems. These systems offer the most sophisticated LEDT applications in the industry.

### How does it work?

The process is referred to as "PhotoBioStimulation" or stimulating life with light. This process can only be accomplished by properly utilizing and controlling the appropriate wavelengths, time and frequency. We do this by designing specific software programs to focus on an area or purpose where improvement is desired.

- **Safe**
- **Effective**
- **Hands Free**
- **Year Round**
- **Cutting Edge**
- **Profit Generating**

### Utilizing Proven Wavelengths

Red (630nm) Infrared (880nm) Blue (420nm)

Here are a few of the Pre-Programmed Protocols:

- Facial Rejuvenation
- Wrinkles
- Blemishes
- Sun Spots
- And More
